Company Announcements Office **ASX Limited** Level 4, 20 Bridge Street SYDNEY NSW 2000

ACTIVITIES REPORT FOR THE QUARTER ENDED 31 DECEMBER 2018

EXPLORATION

There was no field work carried out during the quarter at the Millennium Zinc Project, in which Hampton Hill Mining (Hampton Hill or the Company) holds a 25% interest (refer Figure 1). The planned Magneto-telluric (MT) geophysical survey seeking new targets within the prospective basin at Millennium is expected to be carried out early in the coming field season.

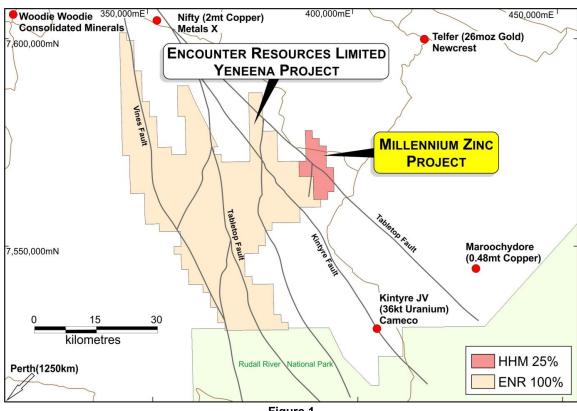

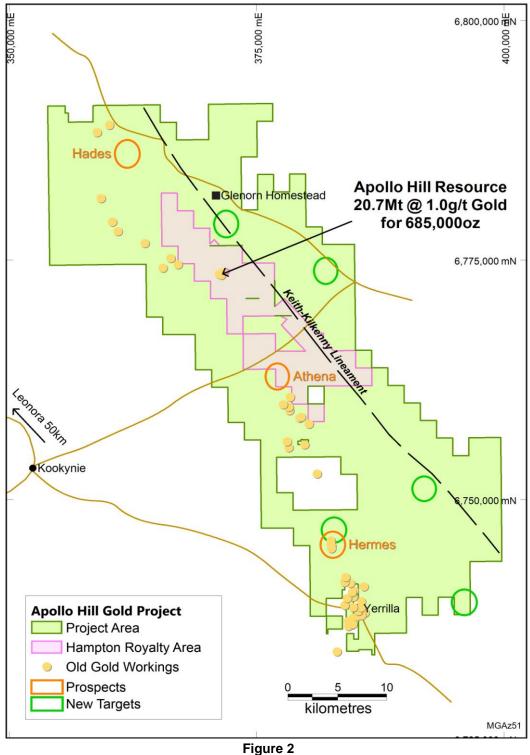

Figure 1

The Company retains an active program seeking new exploration opportunities.

ROYALTY INTERESTS

At the Apollo Hill Project, Saturn Minerals Limited (Saturn) announced a new resource statement for the Central Leases during the quarter (refer Figure 2). Hampton Hill holds a 5% gross overriding royalty over all gold production in excess of 1 million ounces from these Central Leases. Shareholders are referred to the Saturn ASX announcement of 19 November 2018 and the Saturn December Quarterly Report for more details. The project resource now stands at 685,000 ounces grading 1.0 gram/tonne of which the majority is in the inferred category. This new figure represents a significant increase in both tonnage and grade and the deposit remains open in most dimensions.

Further drilling is scheduled with confidence that this resource will grow and there is the possibility of higher grades. Recent intersections outside the resource outline included a 27 metre intersection from the Ra Zone grading 1.12 grams /tonne. Widely spaced shallow intercepts have revealed a 300 metre corridor of mineralization extending 150 to 300 metres both north and south of the known resource.

A 35 hole (3,600 metre) reverse circulation drilling program is planned to commence within weeks seeking to extend the resource. Saturn is also currently carrying out a 125 hole (5,000 metre) air core drilling program to further evaluate emerging regional targets which will include work at the Central Leases Athena target.

At the Northlander Project, Evolution Mining Limited did not report any drilling during the quarter. Hampton Hill holds a 0.98% net smelter gold royalty and certain other rights in relation to the five tenements of this project (refer Figure 3).

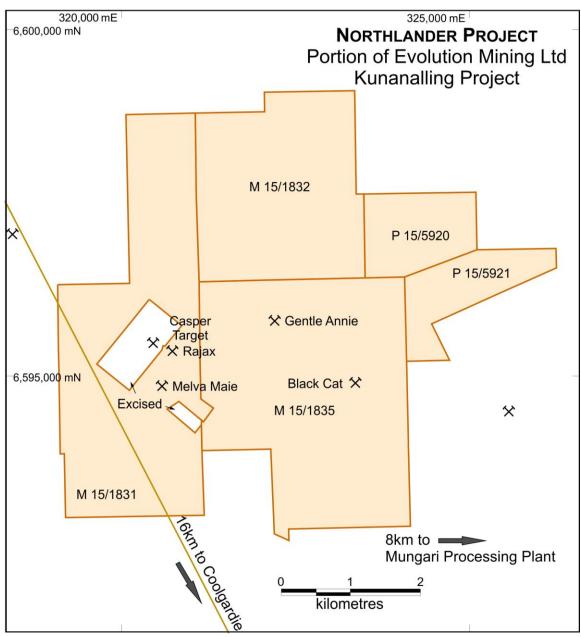

Figure 3

EQUITY INVESTMENTS

Hampton Hill holds investments of 10.35 million shares in Peel Mining Limited (Peel) and 1.25 million shares in Saturn which, as at the date of this report, have a total market value of approximately \$5.2 million. Peel continues to report significant exploration success from its base metal projects in the Cobar district of NSW which include the Southern Nights, Mallee Bull and Wirlong projects. Peel also holds a 36% interest in Saturn.

Shareholders are referred to the December 2018 quarterly reports of both Peel and Saturn for further details relating to these assets.

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
